

I still remember the day you guys came to my school, and really, what was said, and the info given, has had a continual impact on my life to this day.

I am still working through my own addiction, but either way it is always nice to know that I am not alone. No one is. I really love what you stand for, and what you stand against. 🙏 So keep going! There are so many people that you have already touched, and many more that I know you'll continue to reach. 💜

Thank you for your work in bringing the FIGHT THE NEW DRUG assembly to our school. Our staff and students felt it was worthwhile, needed, and a great learning opportunity.

A couple of our staff attended the parent night at CVHS and had positive feedback. I was pretty impressed how the presenter was able to keep 900 students quiet and interested . . . GREAT presentation!

Your parent meeting was very informative. The Presenter was very good at calming the nerves of some anxious and skeptical parents. The event for the middle school students was very engaging, interesting, and fun for the students. It was enlightening and eyeopening for many people.

The content that Fight the New Drug presents, both on social media and in live presentations is spot on! It is all presented in a way that doesn't promote shame, but rather teaches how watching can lead to addictive decisions and it has a harmful influence on people's brains, relationships, mental health and motivations. The information given is based on highly esteemed research and they give tons of links and ways to break free of using porn if one desires to do so.

Our schools and community members gave us really great feedback after attending the presentation and are following on social media to continue to get the information that will benefit them.
